SUPPLEMENT TO

The Gazette of India.

No. 50.] CALCUTTA, SATURDAY, DECEMBER 12, 1908.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8hrs. on Thursday, the 10th December 1908, based on the Indian Daily Weather Reports of the period.

A depression appeared over Persia at the beginning of the week, and as it travelled eastward it caused rain at Jask and Muscat and in Baluchistan. When it entered India, however, it ceased to have any influence on the weather beyond occasioning heavy cloud in Kashmir and light cloud in parts of north-west India. Two other feeble disturbances gave cloud in Kashmir, but no precipitation, and in the rest of the country skies were generally clear and weather dry except for light rain on the south of the Madras coast.

Burma.—There was no rain and skies were almost free from cloud. Temperature was in defect in Upper Burma and normal in Lower Burma.

North-east India including Orissa.—Skies were clear and temperature in the day time was normal, but the nights were cooler than usual.

The United Provinces, Central India and the Central Provinces.—Light cloud appeared occasionally at some stations chiefly in the United Provinces, but skies were generally clear and temperature was normal except in parts of the division where the minimum was in defect.

North-west India.—Light rain was reported from Baluchistan on the 4th and 5th. Cloud appeared occasionally, chiefly in Baluchistan and the extreme north of India, and temperature at night was generally above normal in the regions of cloud and normal or in defect elsewhere.

The Peninsula.—Pamban and Negapatam had light falls of rain. Skies were cloudy in south-east Madras and clear in the rest of the Peninsula. Temperature was normal or in defect, the deficiency being shown chiefly at night, and in the north of the division.

This week commences a new rainfall period. The normal rainfall is very small except at the stations in the Bay in south-east Madras and on the north Madras coast in all of which areas the rainfall has been largely in defect.

Correction.

The following paragraphs should be substituted for those printed in last week's rainfall summary :—

The United Provinces, Central India and the Central Provinces.—Skies were clear except for occasional light cloud in parts of the western districts and temperature was normal or in defect, the deficiency being most marked at night.

The Peninsula.—The only part of the division where rain occurred was the East coast from Madras southward. Moderate to heavy cloud was reported from south India on the 30th November and 1st December, but apart from this skies were either clear or only lightly clouded. Temperature was approximately normal during the greater part of the week except in parts of the Deccan, where the nights were cooler than usual: on the 3rd temperature at night was in defect everywhere except on the West coast.

The following summarises the chief rainfall amounts of the week as reported at 8hrs. each day :—

November 30th. Madras 3·12″.
December 1st. Negapatam 1·64″.
" 2nd. Pamban 1·85″.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 5th December 1908.

Burma.—Reaping of early wet weather paddy is progressing everywhere and reaping of late wet weather paddy has commenced in places. Gathering of groundnuts and plucking of cotton are in progress. Cultivation of island and winter crops is progressing. Standing crops are generally satisfactory except in Kyaukpyu where the estimate is 11 annas owing to damage by rain. Slight damage has also been caused in Katha and Kyaukse. The price of paddy has risen slightly in three districts and has fallen heavily in three.

Eastern Bengal and Assam.—There was no rain during the week. Harvesting of winter rice is in progress. The crop has suffered considerably in some districts from want of rain. On the whole prospects are fair. The tea season has practically closed. Stocks of food grains are normal except in parts of Rangpur where test relief-works are in progress. Cultivation of spring crops is going on. The average price of rice continues unchanged. Cattle disease is prevalent in Backarganj, Noakhali, the Chittagong Hill Tracts, Malda, the Khasi Hills, Goalpara, Kamrup, Darrang and Sibsagar.

Bengal.—There was no rain during the week. The pressing of sugarcane continues in Bihar and Orissa. Spring crops are being irrigated from well and canal water where available, but rain is badly wanted for these crops and also for sowings, which are still going on in a few districts on low lands with the help of irrigation. Spring crops are suffering for want of moisture in the soil in Khulna, Gaya, Muzaffarpur, Darbhanga, Bhagalpur, Purnea and the Sonthal Parganas. Harvesting of winter paddy is in progress. The outturn of the crop is poor in North Bihar. Damage to spring crops by insect-pests is reported from Patna. Prices of common rice have risen in Nadia, Jessore, Darbhanga, Monghyr and Singhbhum, and have fallen in Birbhum, Hooghly, Gaya, Shahabad, Champaran, Muzaffarpur, the Sonthal Parganas, Puri, Hazaribagh and Manbhum. Stocks of food-grains are again reported to be insufficient in Balasore. Cattle-disease prevails in Burdwan, Bankura, Midnapore, Gaya, Muzaffarpur, Darbhanga, Monghyr, Purnea, Ranchi, Palamau and Manbhum. The water-supply is sufficient. Fodder is insufficient in parts of the Sonthal Parganas only. 3,717 persons were employed on the test-works in Nadia and Darbhanga. Gratuitous relief was given to 2,048 persons in Orissa and 1,618 in Darbhanga.

United Provinces.—The week was rainless. Rain is generally needed. The need being great in several districts. Harvesting of autumn crops is now practically completed. Sowings of spring crops are still going on. Germination is good. Standing crops are in fair to good condition. Irrigation is in progress. Malarial fever has generally delayed operations but is now decreasing. Agricultural stock are mostly in good condition. Prices have fallen in 11 districts but are stationary elsewhere. Fodder and supplies are adequate and there is a good demand for labour.

Punjab.—Rainfall *nil*. Rain is needed in Rhotak, Sialkot and Rawalpindi. Autumn crops are being harvested and their condition and expected yield are generally good to average but they are below average in Jhang. The outturn of cotton is generally below average in Lahore and Lyallpur. Harvesting of *toria* continues in Lyallpur. Sowings of spring crops are somewhat late in Rohtak, Gurgaon, Ambala and Amritsar. Spring sowings are extensive and the crop is doing well. Spring crops have been damaged by insects in Gurgaon. Grass-hoppers are injuring the wheat crop in Mianwali. Malarial fever is still prevalent throughout the Province but is abating in several districts. Prices are high but have fallen slightly. Cattle are in good condition. Fodder is sufficient except in Gurgaon, Sialkot, Lyallpur and Jhang.

North-West Frontier Province.—No rain fell during the week except 3 cents in Kohat. It is now wanted for unirrigated lands. Standing crops are generally good throughout the province. Harvesting of autumn crops still continues and the yield is expected to be average both on irrigated and unirrigated areas. Pressing of sugarcane is in progress in the Peshawar district. Spring sowings continue. In Dera Ismail Khan they have been finished. Fodder and water supply in canals is sufficient. Irrigation from the Paharpur Canal has been stopped for clearance of silt. The condition of cattle is generally good except that foot-and-mouth disease is reported in one village of the Nowshera tahsil in the Peshawar district. Malarial fever is still prevalent throughout

the Province. Prices of wheat and *bajra* show a slight tendency to rise. Prices :—wheat $8\frac{7}{8}$ to $11\frac{1}{2}$; gram $9\frac{1}{16}$ to $12\frac{1}{2}$; maize 10 to 18 ; and *bajra* 14 to $14\frac{3}{4}$ seers por rupee.

Jammu.—There was no rain during the week. Prices are fluctuating. Wheat sells from $6\frac{1}{2}$ to 13 and maize from 10 to 20 seers per rupee. The condition of standing crops is fair. Fodder is sufficient.

Kashmir.—The weather is bright. Crops are in good condition. Spring sowings are in progress. Fodder is sufficient. Prices are unchanged.

Rajputana.—Spring sowings continue. Young crops where they have already germinated are being watered and are doing well. Cattle are generally in good condition except in a few places in Dungarpur, Bharatpur and Merwara. The fodder and water-supply is sufficient. Prices have risen in the Hill Tracts of Mewar, Tonk and Bundi but have fallen in Partabgarh and Karauli. On the whole prices are considerably higher compared with the normal.

Central India.—Rain *nil.* Spring sowings are nearing completion in Bundelkhand and are in progress in Gwalior and Baghelkhand. Harvesting of autumn crops is in progress elsewhere. *Juar* has been damaged slightly by insects in parts of Indore and other crops in parts of Bundelkhand, Malwa and Bhopawar. Agricultural stock are fair to good. Cattle disease is prevalent in parts of Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly in Bundelkhand ; are fluctuating in Malwa and are high but stationary elsewhere. Poppy sowing is in progress in Gwalior, Indore, Bhopal and Baghelkhand.

Central Provinces.—The weather has been clear and cool. Reaping, threshing and winnowing of autumn crops and picking of cotton are in rapid progress. Sowing of spring crops has been completed. The condition of standing crops is generally good but a shower would be welcome throughout the Provinces and is much needed in the Janjgir tahsil of the Bilaspur district to prevent young plants from withering. Gram is in flower in parts of Buldana. Fodder and water are sufficient. Agricultural stock are doing well. Prices :—wheat fell by $\frac{1}{4}$ seer in Saugor and Jubbulpore and rose in Narsinghpur by $\frac{1}{2}$ seer per rupee. Rice in Drug and *juar* in Buldana became dearer by $\frac{3}{4}$ seer and $1\frac{1}{2}$ seers respectively ; elsewhere prices were steady or fluctuated slightly exhibiting a tendency to fall. The number of weavers on relief was 1,670.

Feudatory States.—Rainfall *nil.* Harvesting of autumn crops is in progress. Prospects are generally favourable but a shower would benefit spring crops in Kawardha and Raj-Nandgaon. Fodder and water are ample. Prices:—rice and *kodon* in Kawardha, Chhuikhadan, Khairagarh and Raj Nandgaon ; rice in Raigarh and wheat in Jashpur fell from $\frac{1}{4}$ to $2\frac{1}{2}$ seers per rupee. Gram in Chhuikhadan and wheat in Raj Nandgaon became dearer by 2 seers and $\frac{1}{4}$ seer respectively ; elsewhere prices remained stationary.

Bombay.—There was no rain during the week. The rainfall for the season is generally sufficient but more is needed in places for spring cultivation. Standing spring crops have been damaged slightly by insects in parts of Larkana and West Khandesh and by grass-hoppers in parts of Ahmednagar; and are withering for want of sufficient moisture in parts of East Khandesh, Nasik, Ahmednagar, Sholapur, the Karnatak and Kolhapur. Cotton and oil seeds have been damaged by insects and wind in parts of Hyderabad. Crops are in good condition elsewhere. Harvesting of autumn crops is completed in the Panch Mahals ; is almost over in Karachi, the Upper Sind Frontier, Ahmednagar and Satara and is in progress in Larkana, Ahmedabad, Surat, Kanara, East and West Khandesh, Nasik, the Karnatak, Kathiawar, Baroda, Rewa Kantha, Cutch and Kolhapur. Threshing has commenced in parts of the Upper Sind Frontier and continues in parts of Sind, Kaira, the Konkan, West Khandesh, Nasik, Poona and Baroda. Picking of cotton is in progress in parts of Hyderabad, Thar and Parkar, East and West Khandesh and Kathiawar. Spring sowings have been completed in Ratnagiri and East Khandesh and continue in parts of Sind, Ahmedabad, the Panch Mahals, Thana, Colaba, East Khandesh, Ahmednagar, the Gujarat Native States and Sawantvadi. The supply of fodder is adequate except in parts of West Khandesh, Nasik and Bijapur. Agricultural stock are generally in good condition and sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara, Bijapur and Cutch. The supply of drinking water is generally sufficient. Water for irrigation is generally adequate except in parts of Nasik. The prices of food grains have risen slightly in the Konkan ; have fallen in the Deccan ; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 32 to 42 per cent. ; in Gujarat 10 to 55 per cent. ; in the Konkan 23 to 32 per cent. ; in the Deccan 13 to 48 per cent. ; and in the Karnatak 32 to 72 per cent. less than the normal. Stocks of grain are generally adequate. Labourers get sufficient field employment and wages are normal. The cultivating and labouring classes are in fair condition.

Hyderabad.—There was no rain during the week. The autumn harvest still continues in parts. The early rice harvest is in progress. Spring sowings continue in parts. The crop is fair but badly in need of rain in parts especially in the Raichur district. Castor seed has been damaged by insects in parts of the Mahbubnagar and Nalgonda districts. A few showers would improve spring crops in all districts. Cotton picking is in progress. Late rice is being sown and lands continue to be prepared in parts. Cattle disease is prevalent in six talukas. Prices :—Wheat 5¼; coarse rice and *juar* 13¼ seers per rupee. White *juar* is selling in Hyderabad City at 11½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 8½ seers in the Paloncha taluka of the Warangal district and the lowest 24 seers in the Nagerkurnool taluka of the Mahbubnagar district.

Mysore.—Rainfall *nil*. Prices of food-grains are high but markets are well supplied. Standing crops are reported to be generally withering for want of rain and the situation is causing anxiety particularly in the Kolar, Tumkur, Bangalore and Chitaldrug districts and in the Maidan talukas of the Shimoga, Kadur and Hassan districts. Relief works may be found necessary in affected tracts early next year. Cattle are generally healthy. Scarcity of water is being felt in parts of Tumkur, Mysore, Hassan, Kadur and Chitaldrug. Fodder is available except in parts of the Tumkur, Mysore and Chitaldrug districts where owing to scarcity of water cattle are being taken to other places in search of pasture.

Coorg.—Picking of coffee and cardamom continues. Prices of food-grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was heavy in Madras ; good in Chingleput and Tanjore ; light to fair in North Arcot, Trichinopoly, Madura, South Arcot and Nellore ; and *nil* elsewhere. Irrigation supplies are insufficient except in Chingleput, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair but some in parts of the Circars, the Deccan, Central Madura and South Canara are withering and some in parts of Kistna, South Arcot, Tanjore and Tinnevelly require more rain. Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of Kistna, Guntur, Bellary, Anantapur, Nellore and Coimbatore. Fodder is scanty in parts of the Circars, the Deccan, Nellore, South Arcot and North Arcot. The condition of cattle is generally good. The price of rice is stationary in eleven districts ; has fallen in two and has risen in ten. The prices of millets have fluctuated as follows :—*Ragi* is stationary in three districts ; has fallen in five and has risen in thirteen. *Cholam* is stationary in five districts, has fallen in two and has risen in seven. *Cumbu* is stationary in two districts ; has fallen in two and has risen in eleven. The public health is generally good. Prospects are generally fair but more rain is urgently required in parts of Guntur, the Deccan and Central Nellore. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

SUPPLEMENT TO

The Gazette of India.

No. 51.} CALCUTTA, SATURDAY, DECEMBER 19, 1908.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8hrs. on Thursday, the 17th December 1908, based on the Indian Daily Weather Reports of the period.

Several feeble depressions entered India from the west, but beyond giving light precipitation in Baluchistan and Kashmir, light cloud in the plains of north-west India and moderately heavy cloud on the hills, they did not affect the weather. In the rest of the country dry clear weather prevailed.

Burma.—Skies were clear or lightly clouded, and temperature was approximately normal.

North-east India including Orissa.—Skies were almost free from clouds and temperature was normal or in defect, the deficiency being shown at night.

The United Provinces, Central India and the Central Provinces.—Skies were clear except in the north-east of the United Provinces where there were occasional clouds. Temperature was nearly normal.

North-west India.—There was moderate cloud in Kashmir where light precipitation occurred at Sonemarg, Minimarg, Srinagar and Dras, but in the plains of north-west India skies were nearly clear. Temperature did not differ much from normal: the maximum was generally normal or in slight defect and the minimum, normal or in slight excess.

Peninsula.—There was hardly any cloud in the north of the division, but in south India skies were lightly to moderately overcast. Day temperature was normal and night temperature normal or in slight defect.

The stations in the Bay and Kashmir are the only areas that received rain during the week and the seasonal rainfall to date is normal in these divisions but is in defect elsewhere except in those parts of India where the normal rainfall for the period is *nil*.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;
The 17th December 1908.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 12th December 1908.

Burma.—No rain fell during the week. Reaping of early autumn rice is still in progress and threshing has commenced in one district of Lower Burma and in the Northern Shan States. Reaping of winter rice is progressing in places. Sowing of spring rice has commenced in three districts of Upper Burma. Sowing of island crops, beans, peas and tobacco is progressing. Plucking of cotton and gathering of groundnuts still continue. Standing crops are in good condition in both parts of the Province except in one district of Lower Burma where slight damage to paddy crops has been done by rain and rats. The price of unhusked rice has risen in two and has fallen in six districts.

Eastern Bengal and Assam.—There was no rain during the week. Harvesting of winter rice is in progress. On the whole the crop promises a good outturn, but in a considerable portion of the Rajshahi Division the crop has been affected materially by continued drought. Test relief works are in progress in parts of the Rangpur district where the state of things has not improved. Cultivation of spring crops continues. The average price of rice has fallen by about 1 per cent. Cattle disease is prevalent in Backarganj, Noakhali, the Khasi Hills, Goalpara, Darrang and Sibsagar.

Bengal.—The week was rainless. Sugarcane-pressing is in progress in Bihar and Orissa. Harvesting of *sirguja*, *til* and *mung* has commenced in Sambalpur, Hazaribagh and Ranchi. Poppy is being sown in Shahabad and Saran, and the seedlings are coming up well in Patna. Spring sowings are approaching completion ; they are, however, still going on in a few districts where moisture is available. Rain is urgently wanted for further sowings and for the standing spring crops, which are reported to be suffering in several districts of North Bihar and also in the Sonthal Parganas, Gaya and Khulna. Harvesting of winter paddy continues. The crop has already been cut for fodder on large areas in Muzaffarpur, Darbhanga and Purnea. The damage to the crop by drought on high lands in some other districts of North Bihar was also considerable. Prospects are bad in Darbhanga and Purnea, and the condition of the poorer classes is bad through want of demand for labour. Insect pests are doing damage to spring crops in Patna. The price of common rice has risen in Hooghly, Jessore, Monghyr, the Sonthal Parganas, Angul and Hazaribagh and has fallen in Birbhum, Nadia, Saran, Champaran, Purnea, Sambalpur and Manbhum. Stocks of food-grains are reported insufficient in Balasore. Cattle-disease is reported from Bankura, Midnapore, Nadia, Gaya, Muzaffarpur, Darbhanga, Puri, Ranchi, Palamau and Manbhum. The fodder supply is sufficient except in parts of the Sonthal Parganas. Scarcity of water is apprehended in portions of North Bihar. The number of persons on test-works in Darbhanga was 4,435. Gratuitous relief was given to 1,938 persons in Orissa and 799 in Darbhanga.

United Provinces.—The week was rainless. Rain is needed in almost all districts and in some urgently. Sowings of spring crops are now practically complete. Standing crops are generally in good condition. They are being irrigated where possible. The condition of agricultural stock is good. Fodder and supplies are adequate. Malarial fever has much diminished. Prices have fallen in eleven districts; have risen in two and are stationary elsewhere.

Punjab.—There was no rain of importance dnring the week. Rain is needed in Rohtak, Sialkot and Rawalpindi. Autumn crops are being harvested and their condition and expected yield are generally good to average; but they are below average in Jhang. The outturn of cotton is below average. Harvesting of *toria* continues in Sialkot, Shahpur and Lyallpur. Sowings of spring crops continue satisfactory but are late in Rohtak, Amritsar and Shahpur. Prospects of spring crops are generally good. Insects are damaging gram and rapeseed in Rohtak. Grass-hoppers are damaging wheat and gram in Shahpur and wheat in Mianwali. Malarial fever is abating. Prices are high but show a slight downward tendency in some districts. Cattle are in good condition. Fodder is sufficient except in Gurgaon, Sialkot, Mianwali, Lyallpur and Jhang.

North-West Frontier Province.—No rain fell during the week. Rain is now required for unirrigated tracts. The condition of standing crops is generally good throughout the Province. Harvesting of autumn crops is still in progress and the yield is reported to be average both on irrigated and unirrigated areas. Pressing of sugarcane continues in the

Peshawar district. Spring sowings are still in progress. The water-supply and fodder are sufficient. Irrigation from the Paharpur Canal has been stopped. Cattle are generally in good condition except that foot and mouth disease is reported in two villages of the Nowshera tahsil in the Peshawar district. Malarial fever is still prevalent but is gradually abating. Prices except of *bajra* are stationary. Wheat sells from 8⅞ to 11½; gram from 9¾ to 12½; maize from 10 to 18 and *bajra* from 13¾ to 14½ seers per rupee.

Jammu.—No rain fell during the week. Prices are fluctuating. Wheat sells from 6 to 13 and maize from 11 to 20 seers per rupee. The condition of standing crops is good. Fodder is sufficient. Spring sowings are in progress.

Kashmir.—There was snow on the hills and slight rain in the plains which did good to crops. The condition of crops is good. Spring sowings are still in progress. Fodder is sufficient. Prices are unchanged.

Rajputana.—Rain is needed in some parts of Karauli. Spring sowings are in progress in almost all the States. Young crops are being watered and are doing well. The condition of cattle is generally good. The fodder and water supply is sufficient. Prices show a tendency to rise in Jaisalmer, Shahpura, Kotah, Kishangarh, Dholpur and Karauli.

Central India.—Rain *nil.* Harvesting of autumn crops is nearing completion in Gwalior and is in progress elsewhere. Spring sowings have been completed in Indore, Bhopal, Bundelkhand and Malwa and are in progress elsewhere. Slight damage has been caused to *juar* in parts of Indore and to other crops in parts of Bhopawar. Agricultural stock are fair to good. Cattle disease is prevalent in parts of Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly in Bundelkhand and are high but stationary elsewhere. Poppy sowing continued in Gwalior, Indore, Bhopal and parts of Baghelkhand.

Central Provinces.—The weather continues clear and cool. Harvesting, threshing and winnowing of autumn crops and picking of cotton are in full swing. Linseed in parts of Damoh and cotton in Wardha have begun to wither for want of moisture. Spring sowings are somewhat restricted in the south and east but germination has generally been from fair to good. Prospects of standing crops are usually favourable but a shower is required almost everywhere to ensure a really good outturn especially in Seoni, Betul, Wardha, Chanda and Bilaspur. Fodder and water are adequate. Cattle are in good condition. Prices:—Wheat in Mandla and Narsinghpur, *juar* in Chhindwara, Wardha and Buldana and rice in Drug and Bilaspur fell by ½ to 2 seers per rupee. Gram became cheaper in Damoh and Narsinghpur by 2½ and 1 seer repectively. Elsewhere prices remained stationary or varied slightly. The number of weavers on relief was 1,927. The increase is due to re-admittance of some weavers in Burhanpur.

Feudatory States.—Reaping, threshing and winnowing of autumn crops continue. Standing crops are generally in good condition but winter rain is needed. Fodder and water are sufficient. Prices.—*Kodon* rose in Chhuikhadan by 1½ and fell in Raj-Nandgaon by ½ seer per rupee. Rice is cheaper by 1 seer in Sakti. There are no variations elsewhere.

Bombay.—No rain fell during the week. The rainfall for the season was generally sufficient but more is needed in places for spring cultivation. Standing spring crops have been damaged slightly by insects in parts of Larkana and West Khandesh; by grass-hoppers in parts of Ahmednagar; by disease in parts of Ahmednagar and Poona; and are withering for want of moisture in parts of East Khandesh, Nasik, Ahmednagar, Sholapur and the Karnatak. Cotton and oil-seeds have been damaged by insects in parts of Hyderabad and cotton by boll-worm in Thar and Parkar. Crops are generally in good condition elsewhere. Harvesting of autumn crops has been completed in Karachi and Kathiawar; is almost over in Larkana, the Upper Sind Frontier, Ahmednagar and Satara; and is in progress in Ahmedabad, Broach, Thana, Kanara, East and West Khandesh, Nasik, the Karnatak, Baroda, Rewa Kantha and Kolhapur. Threshing continues in parts of Sind, Kaira, the Konkan, West Khandesh, Nasik, Poona, Baroda, Palanpur and Rewa Kantha. Picking of cotton is in progress in parts of Hyderabad, Thar and Parkar, East and West Khandesh and Kathiawar. Spring sowings have been completed in Thana and East Khandesh; are almost over in Larkana, Thar and Parkar and Colaba; continue in parts of Sind, Ahmedabad, West Khandesh, Nasik, Ahmednagar, Baroda, Palanpur, Mahi Kantha and Sawantvadi and have commenced in Kanara. The supply of fodder is adequate except in parts of West Khandesh, Nasik, Bijapur and Kolhapur. Agricultural stock are sufficient, except in parts of the Deccan, Bijapur and Cutch, and are generally in good condition. The supply of drinking water is sufficient except in parts of West Khandesh and Kolhapur. Water for irrigation is adequate except in parts of Nasik. Prices of grains have fallen slightly in the Karnatak and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 30 to 32 per cent.; in Gujarat 17 to 55 per cent.; in the Konkan 23 to 32 per cent.; in the Deccan

13 to 49 per cent. and in the Karnatak 32 to 65 per cent. less than the normal. Stocks of grain are generally adequate. Labourers get sufficient field employment and wages are normal. The cultivating and labouring classes are in fair condition.

Hyderabad.—No rain fell during the week. The autumn harvest is nearing completion. The early rice harvest continues. The spring crop is in fair to good condition but is badly in need of rain in parts, specially in the Raichur district and the Ashti taluka of the Bir district. Castor seed has been damaged by insects in parts of the Telingana district. A few showers would still improve spring crops all over the Dominions. Late rice sowings continue and more lands are under preparation. Wheat sowings were commenced in October and the early part of November. The crop is in fair to good condition but requires rain in parts. Cattle disease is prevalent in 5 talukas. Prices :—wheat 5¼ ; coarse rice 6¼ ; and *juar* 13½ seers per rupee. White *juar* is selling in Hyderabad City at 11½ seers per rupee. Yellow *juar* is not available. The highest price in districts is 8½ seers in the Paloncha taluka of the Warangal district and the lowest 24 seers in the Nagarkurnool taluka of the Mahbubnagar district.

Mysore.—The price of food grains has risen slightly in Kolar, Mysore and Kadur; t is steady elsewhere. Standing crops are withering for want of rain. Prospects of the season are unfavourable. Cattle are generally healthy but rinderpest is prevalent in parts of the State. Fodder is available except in parts of Tumkur, Mysore, Kadur, Shimoga and Chitaldrug. Scarcity of water is being felt in rural parts generally. All over the State steps are being taken to sink wells in affected parts.

Coorg.—Picking of coffee and cardamoms continue. Prices of food-grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—There was light rain in Tanjore and *nil* elsewhere. Irrigation supplies are insufficient generally except in Chingleput, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair but some in parts of Guntur, the Central and South Deccan and South Canara are withering and some in parts of the Circars, Nellore and South Arcot require more rain or water. Harvests continue with outturn poor to bumper. Pasture is sufficient except in parts of Kistna, Guntur, Bellary, Anantapur and Coimbatore. Fodder is scanty in parts of the Circars, the Deccan, Nellore, South Arcot and North Arcot. The condition of cattle is generally good. The price of rice is stationary in eleven districts; has fallen in two and has risen in ten. The prices of millets have fluctuated as follows :—*Ragi* is stationary in three districts and has risen in eighteen. *Cholam* is stationary in two districts ; has fallen in three and has risen in nine. *Cumbu* is stationary in four districts ; has fallen in three and has risen in eight. The public health is generally good. Prospects are generally fair but more rain is urgently required in parts of Guntur, the Deccan, Nellore, Central and South Arcot. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the *Gazette of India*.

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief."

R. W. CARLYLE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Memorandum on the meteorology of India during October and November 1908, with a discussion of the conditions affecting the rainfall in northern India and the snowfall on the neighbouring mountain areas during the cold weather of 1908-1909.

METEOROLOGY OF INDIA DURING OCTOBER AND NOVEMBER, 1908.

1. *October*—

(*a*) At the commencement of the month a shallow depression was passing northeastwards through the Punjab and was giving moderate precipitation in Kashmir. The disturbance had disappeared by the morning of the 2nd. In the absence of observations from the region to the west of upper India it is not possible to trace the origin of this depression, but it probably travelled from the west and was of a type which, although common during the winter season, is very exceptional in the early part of October. It was also remarkable in that snowfall occurred at as low an elevation as about 8,500 feet in Kashmir.

(*b*) During the first nine days the trough of low pressure ran north and south over northeast India and the Bay, with the result that rainfall was confined to Assam, Burma and the coast districts. The position of the trough ordinarily changes by a large amount during the first half of October, but in the present year the changes were remarkably rapid and the field of the Bay current was much more restricted than usual.

(*c*) The pressure distribution underwent a large change on the 10th and 11th, and during the following four days it was such as is associated with the prevalence of general dry weather over the Indian region with the exception of Tenasserim. On the 16th a depression appeared over the Andamans and, advancing very slowly across the Bay, was shown off the south Coromandel coast on the 21st; up to this date little rain had occurred. From there the disturbance moved westwards and had past out into the extreme southeast of the Arabian Sea by the 24th. Very little information is as yet available for the Arabian Sea, and it is not now possible to trace the further career of the depression. From the report of the mail steamer *Arcadia* which encountered very stormy weather in the centre of the Arabian Sea on the 28th and 29th, it would appear that the disturbance was travelling along a curved path towards the coast of Arabia and that it had intensified considerably during its passage over the Arabian Sea. Altogether this was a very remarkable storm. It seems to have originated in the Gulf of Siam and to have marched by an unusually southerly course across the Bay into the Arabian Sea. It is one of the longest lived storms on record and was instrumental in determining a prolonged burst of rain to the southern half of the Peninsula.

(*d*) The extremely southward position of the area of low pressure in the Bay during the last eleven days was more nearly that of December, when the monsoon current finally retreats, than that of October; and it was owing to this that the rainfall due to the Bay monsoon current was almost confined to the south of the Peninsula.

(*e*) The character and distribution of rainfall were determined by the early retreat of the monsoon currents from the east of the Gangetic plain and the

Central Provinces, and by the abnormally southerly path of the disturbance of the last fortnight. The precipitation of the month was accordingly in excess only in Burma and Madras, and in defect over the remainder of the country with the exception of northwest India where little or no rain is received even under normal conditions. Over the greater part of the region of scanty rainfall the deficiency was more than 50 per cent. in amount, and was absolutely greatest in Hyderabad and the Central Provinces, Central India, Bombay and the United Provinces, which received only from 5 to 21 per cent. of their normal amounts. Weather was, as is ordinarily the case, dry throughout the month in Baluchistan but it was more unsettled than usual in Kashmir.

The rainfall of the country as a whole was 1·2″ or 36 per cent. below the normal.

(*f*) The air was damper than usual in the plains of northwest India, the cause being the excessive precipitation of August and September: humidity was on the other hand very much in defect in Bengal, the United Provinces and the Central Provinces. Skies were covered to about the usual extent except in northeast India and Mysore, where the proportion of cloud was unusually low. Temperature was approximately normal in almost all parts of the country.

2. *November*—

(*a*) Weather was more or less unsettled in the Bay during the first twelve days owing to the formation of three disturbances. The first of the series appeared over the southwest of the Bay on the 1st, but failed to develop into a storm and had disappeared entirely by the 5th after having given moderate to heavy rain on the Coromandel coast and few falls in the rest of south India. The second disturbance appeared in the east of the Bay and gave nearly general rain in upper Burma from the 3rd to 8th, but like its predecessor it did not give rough weather in the Bay. The last of the series was shown as a well defined depression over the Andamans on the 9th. It advanced northwards growing rapidly in intensity, and on the early morning of the 12th crossed the Arakan coast near Akyab where it did considerable damage to the port. It was the cause of nearly general rain in Burma during its existence.

(*b*) During the remainder of the month there was a tendency to the establishment over the Bay of the pressure distribution characteristic of December, with the result that there was practically no rain either in Burma or Madras. At the end of the month weather was becoming disturbed again over the Bay owing to the appearance over the Andaman Sea of a depression from the east.

(*c*) Weather was drier even than usual over northern India, although a few falls of rain occurred in the submontane and hill districts of the Punjab on the 26th owing to a very ill-defined disturbance in northwest India; very slight snow also fell two days later in parts of Kashmir and perhaps also of the Punjab Himalayas.

(*d*) Weather was less disturbed than usual throughout the country, with the exception of Burma and Eastern Bengal where the total rainfall of the month was in excess by 305 and 10 per cent. respectively. Little or no rain fell over northern and central India, Bombay, Hyderabad and Mysore, and only moderate rain in Madras: the deficiency was not, however, large in amount except in Mysore and Madras which ordinarily receive heavy rain during the month.

(*e*) On the average of the whole country rainfall was in defect by 8 per cent. of the month's normal amount.

(*f*) Scarcely any rain fell over the greater part of Persia: the deficiency amounted to 1·8″ or 92 per cent. at Bushire.

(*g*) As might be expected from the character of the weather, humidity and the amount of cloud were low over a large part of the country: a significant exception occurred however in north-west India, where in the plains, in spite of the prevalence of dry weather, humidity was very high owing mainly to heavy monsoon precipitation. Temperature agreed well with the normal, the divisional departures in all cases being within 1½° of it.

3. The following table gives information regarding the rainfall as obtained from the data of the Indian Daily Weather Report for the period from 1st October to the 30th November:—

Division.	Rainfall, 1st October to 30th November.			
	Actual, 1908.	Normal.	Departure of actual from normal.	Percentage departure from normal.
	″	″	″	
Burma	15·6	8·7	+6·9	+79
Eastern Bengal and Assam	3·3	5·3	—2·0	—38
Bengal	1·1	5·0	—3·9	—78
United Provinces	0·3	1·6	—1·3	—81
Punjab	0·1	0·2	—0·1	—50

Bombay	0·5	4·0	—3·5	—88
Central India	0·2	1·7	—1·5	—88
Central Provinces	0·1	2·5	—2·4	—96
Hyderabad	0·2	3·5	—3·3	—94
Mysore	2·0	8·3	—6·3	—76
Madras	11·2	15·0	—3·8	—25
Mean of India when the size of the above areas is taken into account.	3·3	4·6	—1·3	—28

Conditions likely to affect the precipitation of the approaching cold weather.

4. Among the chief features of the air movement in the Indian region are the ascensional currents near the equator, and of these the only indications now

available are those derived from the rainfall at Zanzibar and Seychelles, which can only represent the large area in question with considerable inaccuracy.

Station.	Actual rainfall.	Normal rainfall.	Departure from normal.	Percentage departure from normal.
	"	"	"	
October.				
Zanzibar	2·58	3·75	−1·17	−31
Seychelles	4·06	4·95	−0·89	−18
November.				
Zanzibar	11·45	7·42	+4·03	+54
Seychelles	4·70	10·82	−6·12	−57

5. Precipitation of October and November in the regions to the west and north of India :—

(*a*) According to telegraphic information the first heavy rainfall of the winter occurred at Kermanshah, in west Persia, on the 15th of November, which is about the normal date, and was accompanied by snowfall on the neighbouring mountains. On the whole the weather in Persia was drier than usual.

(*b*) In Baluchistan there was absolutely no precipitation.

(*c*) There was slight snowfall on the highest peaks of the Sufed Koh on the 15th of October and again on the 12th and 25th November, while some snow fell also in the Afghan and Kafiristan mountains. Weather is dry and skies are clear.

(*d*) Occasional snowstorms occurred in the mountains of Kashmir during October and November, but recently a change has taken place and weather is now dry and frosty. The Deosai pass is closed. In Ladak there was general snowfall on the 27th and 28th November ; the fall on these dates measured 5 inches in depth at Leh.

(*e*) No information is available at present for the Punjab Himalayas, but so far as can be judged from the condition of the mountains visible from Simla the snowfall during the past two months has been lighter than usual and the snowline is by no means low.

(*f*) The climatic conditions at Gangtok in Sikkim are normal, and the weather dry and cold ; there have been the customary occasional slight falls of snow at elevations over ten thousand feet.

6. Some idea of the extent to which the present atmospheric conditions are favourable for precipitation may be derived from a knowledge of the differences between the pressures as given by hill stations and stations in the plains below them, together with the corresponding temperatures. The following table gives the mean departure from normal during November of these pressure differences :—

Baluchistan.	Kashmir.	Central Himalayas.
−"007	+"013	+"005

The mean of these differences is +"004", and the mean of the departures from normal during November of the corresponding air temperatures is −0·8° F.

7. An examination of the following table of departures from normal will show the extent to which the preceding data may be relied upon as giving indications of the character of the precipitations of the ensuing cold weather.

Year.	November.						Rainfall.	
					In regions north and west of the Punjab.			
	Zanzibar rainfall.	Seychelles rainfall.	Mean of vertical pressure differences.	Previous column corrected for temperature.	Rainfall.	Snowfall.	Succeeding January.	Succeeding February.

8. Of the factors given in the previous table a deficiency of rainfall at Zanzibar and Seychelles tends to be followed by a deficiency of winter rainfall; in the present case this evidence as to the ascensional movement in the equatorial region is conflicting, and no inference can be drawn in either direction.

9. The effect of the pressure and temperature conditions of the hill stations of upper India is believed to be proportional to the quantity in the fifth column which this year indicates the likelihood of a normal winter.

10. Perhaps the most reliable inferences may be drawn from the lateness or earliness of the setting in of the cold weather conditions in the hill regions of Persia, Baluchistan and Afghanistan, and in the Himalayas, the association being of lateness with deficient winter precipitation, and of earliness with abundant rain and snow. Further it may be inferred from the information now available that the conditions in question are normal, or perhaps slightly less advanced than usual.

11. Summing up, it may be said that, of the three factors which appear to be most important, the subequatorial rainfall and the air data at the hill stations would lead to an anticipation of normal conditions, while the time of setting in of the cold weather points to a winter whose severity is normal or only very slightly below it

INFERENCE.

The conditions which appear to have most influence upon the character of the approaching cold weather are this year very nearly normal, and it is therefore probable that the amount of rainfall in northern India and of snowfall on the neighbouring mountain areas will, at any rate during the earlier part of the season, approximate closely to the average.

GILBERT T. WALKER,
Director General of Observatories.

R. W. CARLYLE,
Secretary to the Government of India.

No. $\frac{26}{214\text{-}4}$ F.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

FORESTS.

Dated Calcutta, the 12th December 1908.

RESOLUTION.

WITH the sanction of His Majesty's Secretary of State, the Governor-General in Council is pleased to direct that in future all Conservators of Forests who have rendered not less than three years' effective service in any grade may, provided they have shown special energy and efficiency during such service, be allowed by the Government of India an additional pension of R1,000 per annum, under article 475 of the Civil Service Regulations (4th edition), subject to the condition that if a Conservator has served only in the Second or Third grade he must have completed 28 years' total qualifying service in order to be eligible for the concession.

2. The orders contained in this Resolution will have effect from the 27th September 1908.

3. The necessary additions will be made to article 475 of the Civil Service Regulations.

Madras	Eastern Bengal and Assam
Bombay	Central Provinces
Bengal	Coorg
United Provinces	Ajmer
Punjab	Baluchistan
Burma	North-West Frontier Province

Superintendent, Port Blair.

ORDERED that a copy of the above Resolution be forwarded, for information and guidance, to the Local Governments and Administrations noted in the margin, the Inspector General of Forests, and the Comptroller, India Treasuries.

Ordered also that a copy be forwarded to the Finance Department, for information and necessary action, and that the Resolution be published in the Supplement to the *Gazette of India*.

R. W. CARLYLE,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

SANITARY.

PLAGUE.

Calcutta, the 17th December, 1908.

The following preliminary statement of plague seizures and deaths reported in India during the week ending the 12th December 1908, is published for general information:—

SUPPLEMENT TO

The Gazette of India.

No. 52.} CALCUTTA, SATURDAY, DECEMBER 26, 1908.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the six days ending at 8hrs. on Wednesday, the 23rd December 1908, based on the Indian Daily Weather Reports of the period.

A depression from Persia began to affect the weather in upper India on the 18th but it was not until the 20th that precipitation commenced in the extreme north of India by which time skies were heavily overcast in Kashmir, and the depression was well marked in the Indus valley: the disturbed conditions have continued for the rest of the week, and snow has been falling steadily in Kashmir.

Burma.—Skies were clear or lightly clouded and temperature was normal.

North-east India including Orissa.—Skies were almost free from cloud. The nights were cooler than usual in Bihar and Orissa, but apart from this, temperature was normal.

The United Provinces, Central India and the Central Provinces.—Skies were clear or lightly clouded. Day temperature was normal or in excess, and night temperature was normal or in defect.

North-west India.—Precipitation occurred at Rawalpindi, Murree, Cherat and in Kashmir, Leh and Skardu being the only stations in the latter area where no snow fell. Skies were moderately to heavily clouded in Kashmir and were clear or lightly clouded elsewhere. On the approach of the depression from Persia temperature rose and was in excess in Baluchistan, Kashmir, Sind and the Punjab, but in the rear of the depression temperature fell, and was in moderate to considerable defect over Baluchistan and the Indus valley.

The Peninsula.—Pamban reported a light fall of rain on the 22nd. Skies were generally clear in the north of the Peninsula and lightly to moderately clouded in the south. Temperature was normal or in defect, the deficiency being shown chiefly at night.

The following are the most important amounts of precipitation expressed as rainfall, reported at 8 hrs. each day:

December 21st. Rawalpindi 0·82″, Murree 1·30″, Minimarg 1·50″ and Sonemarg 1·40″.
" 22nd. Srinagar 1·15″, Sonemarg 2·40″, Dras 0·77″ and Minimarg 1·00″.
" 23rd. Sonemarg 3·50″.

Seasonal rainfall up to the close of the preceding week was normal in the Bay stations and in Kashmir, and in defect in the North-west Frontier Province. The rainfall of the past six days has made it in excess in the first two areas and normal in the third. No other change of importance has occurred.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;
The 23rd December 1908.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 19th December 1908.

Burma.—A minute amount of rain fell during the week in Tavoy and Mergui; there was no rain elsewhere. Reaping of early autumn rice is nearly completed and that of winter rice is progressing in several parts of the Province. Threshing of paddy is progressing. The cultivation of spring rice and of miscellaneous crops is in progress. Plucking of cotton and gathering of groundnuts are progressing and harvesting of sesamum has commenced in one district. Slight damage to standing crops is reported in parts of Katha. Prospects are good in both parts of the Province. The price of unhusked rice has fallen in nine districts.

Eastern Bengal and Assam.—No rain fell during the week. Harvesting of winter rice is finished in the Dacca district and is in progress in others. The crop has been considerably damaged by the early cessation of the rains in the Rajshahi division, where test relief works were started during the week in parts of Dinajpur and Bogra and are still in progress in Rangpur. Sowing of spring crops is nearly finished but rain is badly needed. The average price of rice continues unchanged. Cattle disease is prevalent in Noakhali, the Chittagong Hill Tracts, the Khasi Hills, Goalpara and Darrang.

Bengal.—There was no rain during the week. Pressing of sugarcane is in progress in Bihar and Orissa. Harvesting of winter paddy still continues, and that of *mung*, *kalai*, *kulthi* and early oilseeds has commenced in Nadia, Bhagalpur, Sambalpur and Ranchi. Poppy sowings have nearly been finished. The seedlings are germinating well in Patna, Rain is badly wanted for spring crops in Bihar. Their prospects are not favourable in North Bihar, Khulna and the Sonthal Parganas owing to the dryness of the season. Insect pests are doing damage to spring crops in Patna and Bhagalpur. A large number of people are migrating to Eastern Bengal and Assam from the Saran district. Agricultural prospects in North Bihar are bad. Scarcity is apprehended in Nadia if good rain is not received soon. The price of common rice has risen in Muzaffarpur and Hazaribagh and has fallen in Birbhum, Howrah, Murshidabad, Khulna, Gaya, Shahabad, Monghyr, the Sonthal Parganas, Balasore and Ranchi. Cattle disease is reported from Burdwan, Midnapur, Gaya, Muzaffarpur, Darbhanga, Monghyr, the Sonthal Parganas, Puri, Sambalpur, Ranchi, Palamau and Manbhum. The fodder supply is sufficient except in parts of the Sonthal Parganas. Scarcity of water is apprehended in some districts of North Bihar and the water-supply is getting deficient in parts of Shahabad, Muzaffarpur and Purnea. The number of persons employed on test works in Darbhanga was 5,543. Gratuitous relief was given to 1,327 persons in Orissa and 799 in Darbhanga.

United Provinces.—Except for an insignificant fall in Garhwal the week was rainless. Rain is now generally, and in many districts urgently, required. Sowings of poppy, and in places of other spring crops, still continue. Standing crops are in good or fair condition but some damage from white-ants is reported and irrigation is difficult in places. Prospects are doubtful in part of Bahraich. Agricultural stock is in good condition. Supplies and fodder are adequate. Malarial fever is still widely prevalent but has much abated. Prices have fallen in nine districts but are stationary on the whole.

Punjab.—There was no rain of importance during the week. Rain is now needed in several districts. Autumn crops are being harvested and their condition and expected yield are generally good to average; they are below average in Jhang. The outturn of cotton is generally below average and maize is poor in Lahore. Harvesting of *toria* continues in Sialkot and Lyallpur and the yield is reported good. Sowing of spring crops continues satisfactorily but is late in Amritsar and Shahpur. Spring crops are in good condition. Malarial fever is abating. Prices are high but have fallen slightly in some districts. Cattle are in good condition. Fodder is sufficient except in Gurgaon, Sialkot, Lyallpur and Jhang. The canal water supply is deficient in Rohtak.

North-West Frontier Province.—Rain averaging from 23 cents in Bannu to 1 inch and 73 cents in Hazara fell throughout the Province except in Dera Ismail Khan. This rain proved most beneficial to the standing crops in the unirrigated tracts. Standing crops are generally in good condition throughout the Province. Harvesting of autumn crops is still in progress and the yield is expected to be average both on irrigated and unirrigated lands. Pressing of sugarcane and sowings of spring crops are still in progress. The water supply and fodder are sufficient. The condition of cattle is generally good

except in two villages of the Nowshera tahsil in the Peshawar district. Malarial fever is now abating. Prices still show a slight tendency to rise. Prices :—wheat 8½ to 11 ; gram 9¾ to 11 9/16 ; maize 10 to 17¾ and *bajra* 13 to 16½ seers per rupee.

Jammu.—Rain drizzling at intervals. Prices are stationary. Wheat sells from 7½ to 9 and maize from 12 to 14 seers per rupee. The condition of standing crops is good. Fodder is sufficient.

Kashmir.—The weather is snowy. Fodder is sufficient. Prices are unchanged. There is no disease.

Rajputana.—Spring crops where they have germinated are being watered and are doing well. Sowings also continue in many States. Cattle disease is reported in parts of Jaisalmer, Banswara, Bharatpur and the Merwara district. The fodder and water supply is sufficient. Prices have fallen to about the normal in Shahpura and slightly in Bikaner and Jaipur, as compared with the last week; in other places prices remain high.

Central India.—Rain *nil*. Harvesting of autumn crops is nearing completion in Gwalior and Baghelkhand and is in progress elsewhere. Spring sowings have been completed in Baghelkhand and Bundelkhand and are in progress elsewhere. The crops have germinated in Indore, but have been damaged slightly in parts of Bhopawar. Agricultural stock are in good condition. Cattle disease exists in parts of Indore, Baghelkhand, Bundelkhand and Bhopawar. Prices have fallen slightly in Bundelkhand and parts of Malwa and Bhopawar ; are rising in parts of Malwa, and are high but stationary elsewhere. Poppy sowings have germinated in Gwalior and are in progress elsewhere.

Central Provinces.—The weather has been clear and cool. Harvesting of autumn crops has almost been completed and threshing and winnowing are in full swing. Picking of cotton continues. Spring crops are doing well but a shower of rain is needed everywhere to improve prospects. In the Hatta tahsil of the Damoh district rain is wanted to prevent wheat and linseed from withering. Gram in Narsinghpur and Buldana, and linseed in Wardha are in flower. Fodder and water are sufficient. The condition of agricultural stock is good. Prices :—The price of wheat fell by ½ seer per rupee in Mandla. Gram became cheaper in Damoh and Bhandara by 2½ and 1⅜ seers respectively and dearer in Narsinghpur by ½ seer. Rice is selling cheaper in Saugor, Seoni, Balaghat, Drug, Raipur and Buldana by ½ to 1⅔ seers per rupee and dearer by ½ seer in Bilaspur. *Juar* has risen in Hoshangabad by 1½ seers and has fallen in Nimar and Buldana by 1 and 1⅔ seers respectively ; elsewhere prices are steady. The number of weavers on relief was 1,953.

Feudatory States.—Harvesting of autumn crops has been completed and threshing and winnowing continue. Standing spring crops are generally in good condition but a shower of rain would prove beneficial. Fodder and water are sufficient. Prices :—wheat became dearer in Kawardha, Chhuikhadan and Raigarh and *kodon* cheaper in Chhuikhadan and Raj-Nandgaon by ½ to 2 seers per rupee. There were no variations elsewhere.

Bombay.—No rain fell during the week. The rainfall for the season was generally sufficient but more rain is needed in places for spring cultivation. Standing spring crops have been damaged slightly by wind in parts of Belgaum ; by grass-hoppers in parts of Ahmednagar ; by disease in parts of Poona and are withering for want of moisture in parts of Thar and Parkar, Nasik, Ahmednagar, Sholapur and the Karnatak. Cotton has been damaged by insects and wind ; and oilseeds by insects in parts of Hyderabad. Crops are generally in good condition elsewhere. Harvesting of autumn crops has been completed in Karachi and Thana, is almost over in Larkana, Nasik, Ahmednagar and Satara, and is in progress in Ahmedabad, Broach, Surat, Kanara, East and West Khandesh, the Karnatak, Kutch, Rewa Kantha and Kolhapur. Threshing continues in parts of Sind, Kaira, the Konkan, East and West Khandesh, Nasik, Poona, Palanpur and Rewa Kantha. Picking of cotton is in progress in parts of Hyderabad, Thar and Parkar, East and West Khandesh and Kathiawar and has commenced in parts of Baroda. Spring sowings have been completed in the Panch Mahals and Sawantvadi ; are almost over in Colaba and Nasik ; and continue in parts of Sind, Ahmedabad, Kanara and Rewa Kantha. The supply of fodder is adequate except in parts of West Khandesh, Nasik, Bijapur, Belgaum and Kolhapur. Agricultural stock are sufficient, except in parts of the Deccan, Bijapur and Kutch, and generally in good condition. The supply of drinking water is sufficient except in parts of West Khandesh, Nasik, Belgaum and Kolhapur. Water for irrigation is adequate except in parts of Nasik. Prices of food grains have fallen slightly in the Konkan and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 30 to 42 per cent ; in Gujarat 17 to 55 per cent ; in the Konkan 18 to 30 per cent ; in the Deccan 13 to 44 per cent ; and in the Karnatak 32 to 58 per cent less than the normal. Stocks of grain are generally adequate. Labourers get sufficient field employment and wages are normal. The cultivating and labouring classes are in fair condition.

Hyderabad.—No rain fell during the week. The autumn harvest is almost over. Cotton picking and the early rice harvest continue. The spring crop is in fair to good condition. Rain is badly needed in parts, especially in the Raichur district and the Ashti taluka of the Bir district. Ryots are emigrating from the latter place. Castor seed has been damaged by insects in a few tracts of the Telingana district. A few showers would improve spring crops all over the Dominion. Late rice sowings continue. Cattle disease is prevalent in four talukas. Prices: —wheat 5¼; coarse rice 6 and *juar* 13½ seers per rupee. White *juar* is selling in Hyderabad City at 11½ seers. The highest price in districts is 8½ seers in the Paloncha taluka of the Warangal district and the lowest 24 seers in the Nagarkurnool taluka of the Mahboobnagar district.

Mysore.—The price of *ragi* has risen slightly in Kolar and Chitaldrug, has fallen slightly in Mysore, and is generally stationary elsewhere. Harvesting of *ragi* is in progress and the outturn is generally below the average. Standing crops are reported to be withering for want of rain. The season's prospects are generally unsatisfactory. Cattle are healthy on the whole but rinderpest is prevalent in parts of the State. Water and fodder are available in Kolar and in the Maidan tracts of Kadur, Shimoga and Hassan but are becoming scarce in other parts of the State.

Coorg.—Picking of coffee and cardamom continues. Reaping of rice has commenced. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—There was no rain during the week. Irrigation supplies are insufficient generally except in Chingleput, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair but some in parts of Vizagapatam, the Central Deccan, Tanjore, Madura and South Canara are withering and some in parts of Ganjam, Kistna, Nellore, South Arcot and Tinnevelly require more rain or water. Harvests continue with outturn poor to bumper. Pasture is sufficient except in parts of the Circars, Bellary, Anantapur and Coimbatore. Fodder is scanty in parts of the Circars, the Deccan, Nellore, South Arcot, North Arcot and Coimbatore. The condition of cattle is generally good. The price of rice is stationary in five districts; has fallen in six, and has risen in twelve. The prices of millets have fluctuated as follows:—*Ragi* is stationary in six districts; has fallen in three and has risen in twelve. *Cholam* is stationary in two districts; has fallen in five and has risen in seven. *Cumbu* is stationary in five districts and has risen in ten. The public health is generally good. Prospects are generally fair but more rain is urgently required in parts of Guntur, the Deccan, Nellore, Central and South Arcot. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

Circular No. $\frac{28}{364-3}$ F.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

FORESTS.

Calcutta, the 22nd December 1908.

REGULATIONS FOR THE APPOINTMENT OF PROBATIONERS TO THE INDIAN FOREST SERVICE, 1909.

1. *Appointments.*—The Secretary of State for India in Council will, in the summer of 1909, make *not less than twelve appointments* of Probationers for the Indian Forest Service, provided that so many candidates are considered to be in all respects qualified.

In making these appointments, he will act with the advice of a Selection Committee.

2. *Applications for Appointment.*—Applications for appointment must be made on a printed form to be obtained from the Secretary, Judicial and Public Department, India Office, Whitehall, London, S.W., and to be returned to him not later than *Thursday, the 1st July 1909.* Candidates must be prepared to present themselves for an interview with the Selection Committee within three weeks from that date.

3. *Age Limit.*—Candidates must be under the age of 23 years on the 1st July 1909.

4. *Nationality, &c.*—Every candidate must be a natural-born British subject. He must be unmarried, and if he marries before he reaches India he will forfeit his appointment. He must be of good physique, and must produce satisfactory evidence of character.

5. *Qualifications.*—Candidates must bring evidence, for the consideration of the Selection Committee, to show that they have passed with honours in a public examination for a degree in some branch of Natural Science, held by a University in Great Britain or Ireland, and that they possess a knowledge of Mathematics up to and including Plane Trigonometry. Special consideration will be given to candidates who possess a Diploma in Forestry granted by a British University.

6. In case the number of duly qualified candidates, who have taken such a degree or diploma, is not sufficient to fill the number of appointments, the Secretary of State for India in Council will nominate candidates who bring evidence to show that they have received a good general education, and that they have a good knowledge of Chemistry and Mechanics and Physics as indicated in the appended Syllabus (Appendix I). A good general education should be understood to include, at the least, a fair knowledge of English Composition, Mathematics up to and including Plane Trigonometry, Latin, and either German or French. A knowledge of Greek is not necessary, but is left to the option of the candidates. The production of school certificates granted by the examining authorities of Universities, or of certificates that a candidate has passed the Matriculation Examination of a University, in the subjects named, or of other certificates held by the Secretary of State in Council to be equivalent, will be taken to show that a candidate satisfies the requirements of this clause. Candidates of this class must not be less than 19 years of age on the 1st of July 1909.

Should there be more candidates considered by the Selection Committee to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination conducted by the Civil Service Commissioners, on the results of which their final selection would depend.

7. *Medical Examination.*—Those candidates who are selected as Probationers will be required to undergo a strict examination by a Medical Board at the India Office, at which particular stress will be laid on good vision and hearing.

On passing this medical examination candidates will be deemed to be Probationers for the Indian Forest Service.

8. *Period of Probation.*—In the case of Probationers who have passed with Honours in Natural Science, as indicated in paragraph 5, the period of probation will extend over two years. In the case of students who have obtained a Diploma in Forestry the period may be two years or less, as may be specially arranged. The probationers will be required to undergo a special course of study at Oxford, and to become members of the University, if not so already. During the vacations they will receive, under suitable supervision, practical instruction in such British and Continental forests as may be selected for the purpose. Excursions are also made for purposes of study in term-time.

In the case of Probationers who have not passed with Honours in Natural Science, the period of probation will extend over about three years.

Probationers must obtain the Diploma of Forestry of the University of Oxford; those who have passed with Honours in Natural Science within two years, and the others within three years. The case of students who have already obtained at another University such a Diploma will be specially considered.

9. *Charges.*—The probationers will be required to defray all expenses of lodging, board, tuition, and excursions while at Oxford, and on practical instruction in Britain and on the Continent, with the exception of fees payable to local forest officers in Britain and on the Continent.

10. *Allowances.*—The Secretary of State for India in Council will pay to each probationer possessing a degree in Natural Science, or a Diploma in Forestry, the sum of 120*l.* annually, or a total of 240*l.* (besides the fees to local officers mentioned above). These payments will be made on the following dates in each year :—

	£
On the 1st December	30
On the 1st March	30
On the 1st June	60

In the case of probationers who have not passed with Honours in Natural Science or obtained a Diploma in Forestry before being appointed probationers, the Secretary of State in Council will give the same total allowance of 240*l.* (in such instalments as may be required to meet the expenses of the practical work), and will defray (as above) the fees payable to local forest officers.

The grant of the allowances is subject to the following conditions :—

(*a*) that the progress of the probationer in his studies is satisfactory;

(*b*) that the probationer gives security to refund the payments in case he fails to join the Indian Forest Service at the end of the period of probation.

11. *Conduct.*—Every Probationer will be required to conduct himself during the period of probation in a manner satisfactory to the Secretary of State, and to give evidence of satisfactory progress in his studies in such a manner as may be required, failing which, or in the event of serious misconduct, he will be liable to have his name removed from the list of Probationers.

12. *Appointment and Seniority.*—Probationers who obtain the Diploma of Forestry, and are of sound constitution and free from physical defects which would render them unsuitable for employment in the Indian Forest

Service, will be appointed Assistant Conservators in the Indian Forest Department. Their position in the provincial Forest Lists will be determined by the results of the examinations held during their probation; but in making selections for the post of Conservator, officers of the same year are reckoned as equal in seniority.

They will be allowed at the end of the period of probation to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India. Officers are, however, at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

13. *Riding.*—Every Probationer, before proceeding to India, will be required to satisfy the Secretary of State, in such manner as may be determined, of his ability to ride.

14. *Articles of Agreement.*—Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and must engage his own passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

15. *Salary.*—An Assistant Conservator of Forests will draw pay at the rate of Rs. 380 a month (equivalent to 304*l.* a year, when the rupee is at 1*s.* 4*d.*) from the date of his reporting his arrival in India.

16. *Promotion, Leave, Pension, and Provident Fund.*—Promotion, leave, and pension will be governed by the Regulations laid down by the Government of India, and applicable to Forest officers, such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India, and their interpretation in case of any doubt arising being left to that Government. A copy of the existing regulation can be seen on application at the India Office.

Certain information regarding appointments in the upper controlling staff of the Indian Forest Service, the pay of which has been recently improved, will be found in Appendix II; a summary of information regarding Leave is contained in Appendix III; and regarding Pensions and the Provident Fund in Appendix IV.

INDIA OFFICE,
27th October 1908.

APPENDIX I (*referred to in paragraph 6*).

Syllabus of Special Subjects for Candidates who have not passed with Honours in a Public Examination in Natural Science.

I.—CHEMISTRY.

The simpler chemical and physical properties of common substances, such as lime, salt, sugar, water, air.

The preparation (excluding details of technical processes) and properties of the following substances:—

The metals, tin, lead, iron, copper, zinc, magnesium, calcium, potassium, sodium; their simpler and more important compounds, especially such as occur naturally, and such compounds and alloys as are used in the Arts.

Hydrogen, oxygen, water, ozone, hydrogen-peroxide.

Nitrogen, ammonia, ammonium salts, nitrous oxide, nitric oxide, nitrogen peroxide, nitrates.

Carbon, carbon dioxide, carbonates, carbon monoxide.

Chlorine, bromine, iodine, chlorides, bromides, iodides, chlorates, hypochlorites.

Sulphur, sulphuretted hydrogen, sulphides, sulphur dioxide, sulphur trioxide, sulphites, sulphates.

Phosphorus, phosphoretted hydrogen, phosphorus trioxide, phosphorus pentoxide, orthophosphates, phosphorus trichloride, phosphorus pentachloride.

Silica.

The principles of chemical change; oxidation and reduction; combustion; flame. Allotropy. Methods of purifying bodies. Methods of determining the composition of air and of water. Laws of chemical combination. Diffusion of gases. The atomic and molecular hypotheses. The simpler methods of determining equivalents. General considerations used in determining molecular weights and atomic weights. Chemical notation.

Alcohol, ethane, and the simpler ethylic compounds, considered in detail as typical bodies. Methylic alcohol and methane, and benzylic alcohol and toluene, considered briefly as analogues of alcohol and ethane. Characters of primary normal alcohols in general, and of their corresponding hydrocarbons.

Acetic acid, aldehyd and the simpler acetic compounds, considered in detail as typical bodies. Benzoic acid and benz-aldehyd, and formic acid and form-aldehyd, considered briefly as analogues of acetic acid and aldehyd. Characters of normal mon-acids in general and of their corresponding aldehyds.

Oxalic acid and the simpler oxalic compounds. Characters of normal di-acids in general.

Processes (i) for the detection of carbon, hydrogen, nitrogen, sulphur in organic compounds; (ii) for the estimation of carbon, hydrogen, nitrogen in organic compounds; (iii) for the production and analysis of the silver-salts of organic acids and the platinum-salts of organic bases; (iv) for the determination of vapour densities by the V. Meyer method.

The determination of the formula of an organic compound.

Practical Work.

The Practical Work should include:—

Simple experiments and preparations illustrating the properties of the inorganic substances named above.

Simple quantitative experiments, such as, the determination of the loss of weight on heating a body, the determination of the volume of gas evolved

on the solution of zinc in acid. The volumetric estimation of acids and alkalies.

The qualitative analysis of simple salts containing not more than one of the following metals, and one of the following acid radicals:—Sodium, potassium, ammonium, calcium, magnesium, zinc, copper, iron, lead, tin, oxide, carbonate, chloride, sulphate, nitrate, sulphide.

II.—MECHANICS AND PHYSICS.

Mechanics.

The principles of the lever, the inclined plane, the composition of forces, and virtual work, their experimental investigation and application to machines and other simple cases of equilibrium, Centre of gravity, couple, torque, velocity ratio, mechanical advantage, efficiency. Application to liquids and gases. Density. Boyle's law. Pump, siphon, barometer, manometer. Body moving in a straight line so that its velocity changes proportionally with the time. Body moving uniformly in a circle. Motion of pendulum-bob. Momentum, force, impulse of a force, energy, conservation of energy.

Heat.

Simple thermometry. Simple methods of determining latent heats; specific heats; expansion of gases, liquids and solids; vapour pressures. Change of state. Simple experiments on conduction, convection and radiation. Mechanical equivalent of heat.

Sound.

Direct determination of the velocity of sound in air and in water; the effect of change of temperature on the velocity of sound in air; mode of propagation of sound in air. Simple methods of determining the pitch of a note. Characteristics of musical sounds.

Light.

Laws of reflection and refraction. Simple methods of determining refractive indices, and the focal lengths of mirrors and lenses. The simplest form of the compound microscope and of the astronomical telescope. Dispersion, the spectroscope, spectra of different kinds. Simple photometry. Elementary notions of the determination of the velocity of light.

Electricity and Magnetism.

Properties of electrified bodies. Methods of electrification. Electric induction. The gold leaf electroscope. Elementary quantitative notions of electrical quantity, capacity, potential, and specific inductive capacity. Condensers. Properties of magnets. Methods of magnetization. Magnetic induction. Simple methods of determining the declination and dip at a place and of comparing magnetic fields and moments. The construction of the batteries of Volta, Darriell, and Leclanché, and their theory. The secondary battery. The physical and chemical action due to a current. Simple galvanometers, ammeters, and voltmeters. Measurement of current-strength, electromotive force and resistance. The production of currents by electromagnetic induction. The broad principles of the induction-coil and dynamo.

Practical Work.

Simple experiments illustrating the principles stated above.

APPENDIX II.

LIST OF APPOINTMENTS IN THE UPPER CONTROLLING STAFF OF THE INDIAN FOREST SERVICE.

NOTE.—*This list shows only the existing number of sanctioned appointments, which is liable to alteration at any time. Forty-three of the appointments shown below in the various grades of Deputy and Assistant Conservators are being gradually transferred to the Provincial Forest Services, which are recruited in India. The rest of the appointments named are held by members of the Imperial Forest Service, which is recruited under these regulations.*

Number according to existing sanctioned scale.	Appointment.	Salary.
		R
1	Inspector-General of Forests . . .	2,650 a month.
2	Chief Conservators (Burma and Central Provinces).	2,150 „
19	Conservators, in three grades . .	1,900 „ 1,700 „ 1,500 „ respectively.
* 136	Deputy Conservators	Rupees 380 a month, rising by annual increments of R40 a month to R700 a month; thereafter, by annual increments of R50 a month to R1,250 a month, in the twentieth year of service.
72	Assistant Conservators	
9	Foreign Service appointments (four temporary).	
†5	Officers employed at the Forest Research Institute and College, Dehra Dun.	

* These 227 appointments are assigned to the various provinces as follows:—Burma, 71; Madras, 39; Bombay, 31; Central Provinces, 25; Bengal, 18; United Provinces, 19; Punjab, 14; and Eastern Bengal and Assam, 10.

† These draw an allowance of R150 a month in addition to their salary.

NOTE.—Under the improved scale of salary shown above, no Exchange Compensation Allowance is granted.

APPENDIX III.

(*See paragraph 16 of the Regulations.*)

LEAVE.

1. The following is a summary of the principal regulations relating to the leave admissible to officers appointed to the Indian Forest Service by the Secretary of State from the United Kingdom.

Long Leave.

2. Furlough is admissible to an aggregate amount of six years during the service. The amount "earned" is one-fourth of an officer's active service, and the amount "due" is that amount less any enjoyed.

3. Furlough without medical certificate can, if due, be generally taken after eight years' active service, and again after three years' continuous service. It is limited to two years at a time.

4. Furlough on medical certificate may be granted (*a*) to an officer who has rendered three years' continuous service, for not more than two years, but capable of extension up to three years; and (*b*) to an officer who has not rendered three years' continuous service, up to one year in any case, and up to such longer period, if any (but not exceeding two years in all), as the officer may have furlough "due" to him.

5. The allowances admissible during furlough are:—

(1) During the first two years of furlough without medical certificate and during so much of furlough with medical certificate as may

be "due"—half average salary, subject to certain maximum and minimum limits.

(2) After the expiration of the period for which the foregoing allowances are admissible—one quarter of average salary, subject to certain maximum and minimum limits.

Short Leave.

6. Privilege Leave is a holiday which may be granted to the extent of one-eleventh part of the time that an officer has been on duty without interruption; and it may be accumulated up to three months, earned by 33 months' service. During privilege leave, the officer retains a lien on his appointment, and receives the salary which he would have received if on duty. An interval of not less than six months must elapse between two periods of absence on privilege leave.

Privilege leave may be prefixed to furlough, special leave, or extraordinary leave without allowances. The whole period of leave thus taken in combination is known as combined leave. Combined leave may not be granted for a period of less duration than six months, nor, except on medical certificate, may it be extended beyond two years.

7. Special Leave may be granted at any time for not more than six months, with intervals of six years' service; allowances, calculated as during furlough, are given during the first six months only, whether taken in one or more instalments. This leave is included in the aggregate of six years' furlough admissible.

8. Extraordinary Leave without allowances may be granted in case of necessity, and, except in certain specified cases, only when no other kind of leave is by rule admissible. It may be granted in continuation of other leave.

9. Subsidiary Leave in India for a minimum of 10 days, usually with half average salary, is granted to an officer proceeding on or returning from leave out of India, or on retirement, to enable him to reach the port of embarkation or to rejoin his appointment. It is admissible only at the end not at the beginning of combined leave.

10. Short Leave is also granted to enable officers to appear at examinations, &c.

General Rules.

11. Leave of absence, whether on furlough or on privilege leave, can never be claimed as of right, and is given or refused at the discretion of Government.

12. After five years' continuous absence from duty, an officer is considered to be out of the employment of Government.

13. When leave allowances other than privilege leave pay are paid at the Home Treasury, or in a Colony where the standard of currency is gold, rupees are converted into sterling at the rate of exchange fixed for the time being for the adjustment of financial transactions between the Imperial and Indian Treasuries, unless any other rate has been exceptionally authorised. But for the present the rate of conversion is subject to a minimum of 1*s.* 6*d.* to the rupee. Privilege Leave pay when issued from the Home Treasury (this is only admissible when privilege leave is combined with other leave) is converted at 1*s.* 4*d.* to the rupee.

APPENDIX IV.

(*See paragraph 16 of the Regulations.*)

PENSIONS AND PROVIDENT FUND.

The following is a summary of the principal pension rules applicable to officers of the Indian Forest Service appointed by the Secretary of State from the United Kingdom.

An officer of the Indian Forest Service is eligible for a pension on voluntary retirement after completing 20 years' qualifying service or attaining the

age of 55 years. If at an earlier date he is compelled to retire from the service through ill-health, not occasioned by irregular or intemperate habits, he becomes eligible for an invalid pension or a gratuity according to the length of his service.

The amount of pension or gratuity is regulated as follows :—

After a service of less than 10 years, an invalid gratuity not exceeding one month's emoluments for each completed year of service.

After a service of not less than 10 years an invalid pension not exceeding the following amounts :—

Years of Completed Service.	Maximum Limit of Pension.	
10	R1,000 a year or	R83⅓ a month.
11	1,400 „	116⅔ „
12	1,800 „	150 „
13	2,200 „	183⅓ „
14	2,600 „	216⅔ „
15, 16, 17, 18, 19	3,000 „	250 „

After a service of not less than 20 years, a retiring pension not exceeding the following amounts :—

Years of Completed Service.	Scale of Pension. Sixtieths of average Emoluments.	Maximum Limit of Pension.	
20 to 24	30	R4,000 a year or	R333⅓ a month.
25 and above		5,000 „ „	416⅔ „

Officers who have shown special energy and efficiency during an effective service of three years as Inspector-General of Forests or Conservator (First Grade) may, at the discretion of the Government of India, be allowed an additional pension of Rs. 1,000 a year.

Subject to certain prescribed conditions, rupee pensions are now issued to pensioners residing in countries where the Indian rupee is not legal tender at the rate of exchange of 1*s.* 9*d.* the rupee.

2. A Provident Fund has also been established on the following basis :—

(*a*) The contribution is compulsory up to 5 per cent. on salaries, with voluntary contributions of a further 5 per cent.; while on leave, an officer may subscribe any sum he pleases, subject to a minimum of 5 per cent. on his leave allowances and maximum of 10 per cent. on his salary.

(*b*) Compound interest on such payments is annually credited by Government to each officer subscribing, the rate being at present 4 per cent. per annum.

(*c*) Receipts and payments are made in rupees only.

(*d*) The sum which will thus accumulate to the credit of an officer to be his absolute property, to be handed over to him unconditionally on quitting the service; or, in the event of his death before retirement, to his legal representatives.

Ordered, that a copy of the foregoing Regulations be forwarded, for information, to the Local Governments, and Administrations noted in the margin, the Inspector General of Forests and the Comptroller, India Treasuries. Also that the Regulations be published in the *Supplement to the Gazette of India.*

H. A. STUART,
Secretary to the Government of India.

Nos. 1589—1592.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

JUDICIAL.

EXECUTION OF DEEDS AND CONTRACTS RELATING TO SALT REVENUE IN BENGAL AND EASTERN BENGAL AND ASSAM.

Calcutta, the 24th December 1908.

RESOLUTION.

In exercise of the powers conferred by section 2 of the East India Contracts Act, 1870 (33 and 34 Vict., C. 59), and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to declare that the classes of deeds, contracts and other instruments mentioned in the clauses below, and referred to in section 1 of the Government of India Act, 1859 (22 and 23 Vict., C. 41), may be executed by the Collectors of Customs, Calcutta and Chittagong, respectively; and to direct that the following clauses be inserted in the Resolution of the Government of India in the Home Department, no. $\frac{3\text{-Judl.}}{485-501}$, dated the 28th March 1895, relating to the execution of deeds, contracts and other instruments on behalf of the Secretary of State for India in Council, as heads L.—IX. and Q.—VI. of that Resolution, respectively.

L.—IX.—Deeds, contracts, and instruments relating to salt revenue. } By the Collector of Customs, Calcutta.

Q.—VI.—Deeds, contracts and instruments relating to salt revenue. } By the Collector of Customs, Chittagong.

ORDER.—Ordered that the above Resolution be communicated to the (1) Government of Bengal for information, with reference to their letter no. 234-T.S.R., dated the 30th July 1907, addressed to the Government of India in the Finance Department, (2) Government of Eastern Bengal and Assam and to the Finance Department for information; and that it be published in the Supplement to the *Gazette of India*.

H. A. STUART,
Secretary to the Government of India.

Statement of Approximate Gross Earnings of Indian Railways.
